The Killing Code  
by Ellie Marney

**Genre: Historical**

**Summary:** The Killing Code is a murder mystery historical fiction novel set in the 1940s following Kit Sutherland; a woman recruited to help the war effort using codebreaking. Kit finds herself along with a group of other codebreakers trying to solve a murder she first stumbled upon. Meanwhile, Kit has to hide secrets that if found out, could destroy the life she's built for herself. I enjoyed the writing of this book immensely, I felt interested and my attention was held throughout the book. My only mild critique was I felt the mystery was a tad predictable but I don't find that ruined the experience. It's more than just a mystery with the historical aspects being present as well. I'd recommend this book to people who greatly enjoy historical fiction or murder mystery. It holds enough historical content to provide an insightful look into the period of the 1940s; however, the book's storyline is not focused on World War II, it is largely about the mystery

aspect.

**Rating: 5 out of 5**
