

1" Button Maker Quick Guide

Supplies needed to make a 1" button

- Artwork
- Pin casing (shell, mylar (plastic covering), pin back)
 - \$1.00 per kit (Makes 6 buttons)

1. Cut out your image.

2. Place the shell part of the pin casing onto the left hand mold. Make sure you only have one.

3. Place the cut image, followed by the mylar cover, on top of the shell. Make sure there is only one piece.

4. Push the mold set to the right and align with the press.

5. Push the handle down to move the shell to the bottom.

6. Place the bottom (pin) side of the tinplate on to the right hand mold.

7. Push the mold set to the left and align with the press.

8. Press the handle down firmly to set your button.

9. Push the slide rail to the right and remove your finished button.
