# Instructions

1. First, take the eye bolt and attach the key ring to it. Then take one wing nut and screw it onto the eye bolt with the wings pointing up towards the top of the eye bolt, put it as high up as you can.
2. Next, use the hexagon nuts and washers as the body in any order you would like. Finish off by screwing the second wing nut on the bottom with the wings point down to the end, this will keep all the body parts on the eye bolt. You may need to rearrange the nuts and washers if they are on the bigger size, to make sure everything stays on the bolt.
3. Put a little dab of hot glue on the bottom of the eye bolt to make sure that last wing nut doesn't unscrew itself in Dad's Pocket.
4. Cut out the provided gift tag and write "I'm nuts about you Dad!" Or decorate it how you would like for your Dad. Make a little hole where the circle is, and put the tag through the keyring.
