

Ellen's PICKS

April 2026

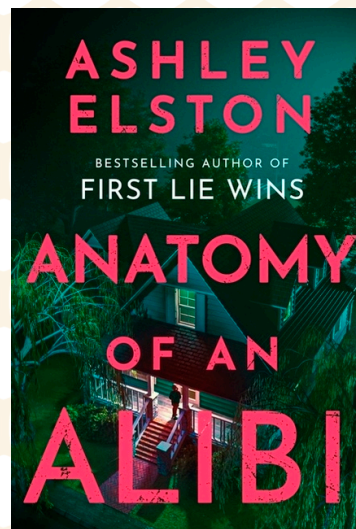

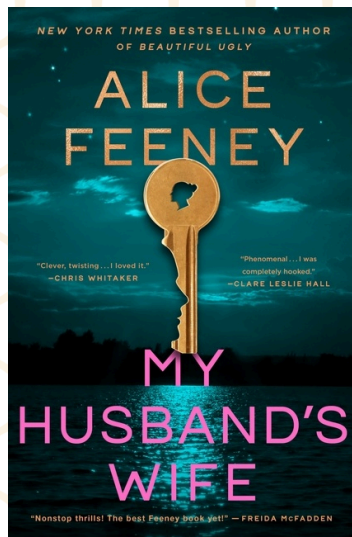

Listened to the audiobook because I heard how amazing it is. And I agree. I am not a Math or Science person- so some of the technical terms and situations went over my head BUT it was still incredible and I will never forget Rocky!!

What a remarkable well researched book! As a Gen Xer - I don't remember when the Edmund Fitzgerald sunk, but I absolutely remember the Gordon Lightfoot song. This non fiction book reads like fiction. Fantastic!

Feeney is hit or miss with me. I don't really know why! This one thankfully was a hit! We have a creepy house, two wives (one is pretending), a mysterious husband and so many twists and turns you will be spinning!

A bit confusing at first, you have to stick with it - it is a complicated & entwined plot. I have really liked both of Elston's adult books.

My favorite book this month
