How to Protect Yourself from Deepfakes, AI Scams & Social Media Manipulation

In this engaging and thought-provoking presentation, digital innovation executive Lee Huang shares powerful real-world examples and demonstrations that reveal how AI is already reshaping communication, scams, social media, and public trust. Attendees will gain a deeper understanding of the growing risks posed by AI-driven deception and manipulation while learning practical ways to better protect themselves, their families, and their businesses in an era where seeing is no longer believing.
